Johnny Parker	No Rotation	Facilitator	Director for Process Improvement	

## Team-based Governance

Faculty, staff, and students may voluntarily participate in the governance of the College by serving on cross-functional quality improvement teams. Teams are responsible for the continuous quality improvement of educational and administrative services within a given "quality cluster." A quality cluster is a group of related processes through which services are delivered to our customers, both internal and external. Responsibility for a given quality cluster is assigned to one of five Systems Improvement Teams (SiTeams).
